DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8-22-2001 has been entered.

Claims 1, 8 and 18 have been amended. Claims 2-7 have been canceled. Claims 1, 8-10, 18-23 and 27-31 are pending and currently under examination.

Claim Rejections Withdrawn

The rejection of claims 1-6, 18-23 and 27-31 under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the insertion of the particular "ZZ" IgG binding domain of Protein A into a viral vector, does not reasonably provide enablement for any other IgG binding domain of Protein A is withdrawn. Applicant's arguments have been fully considered and deemed persuasive. Cancellation of claims 2-6 have rendered the rejection of those claims moot.

The rejection of claims 1-10, 18-23, and 27-31 under 35 U.S.C. 103(a) as being unpatentable over Barber et al. (US Patent 5,591,624) and Wickham et al. (US Patent 5,846,782), in view of Nilsson et al. (Nilsson et al. 1987 Protein Eng. 1: 107-113) is withdrawn. Applicant's

Art Unit: 1645

arguments have been fully considered and deemed persuasive. The cancellation of claims 2-7 have rendered the rejection of those claims moot.

New Grounds of Rejection

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 8-10, 18-23 and 27-31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 18 are rendered vague and indefinite by the use of the phrase "alters natural viral tropism" It is unclear what is meant by said phrase. The viral tropism of what? How is it altered? As written, it is impossible to determine the metes and bounds of the claimed invention.

The term "high efficiency" in claims 1 and 18 is a relative term that renders the claim indefinite. The term "high efficiency" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Conclusion

No claim is allowed.

Claims 1, 8-10, 18-23 and 27-31 are free of the art of record.
